01 ABOUT ARYA GLASS

About Arya Glass

Arya Glass stands as one of India's most distinguished names in the architectural glass, designer glass, and customized glass solutions industry. Since our establishment in 1991, we have been at the forefront of transforming ordinary spaces into extraordinary environments through the art and science of glass.

Headquartered in Kandivali West, Mumbai, we serve a prestigious clientele that includes leading architects, interior designers, builders, developers, and discerning homeowners across residential, commercial, and hospitality sectors. Our commitment to innovation, precision, and aesthetic excellence has made us the preferred partner for luxury glass solutions in Maharashtra and beyond.

"Every piece of glass we craft carries the soul of artistry and the strength of engineering."

Legacy & Philosophy

At Arya Glass, we believe that glass is not merely a material — it is a medium of expression. Our philosophy is rooted in the seamless fusion of traditional craftsmanship with cutting-edge technology. We take immense pride in our ability to translate visionary designs into tangible, breathtaking realities that elevate architectural spaces to new heights of sophistication.

Our legacy is built on three unshakeable pillars: uncompromising quality, relentless innovation, and deeply personalized client relationships. Every project we undertake is a testament to our dedication to excellence and our passion for pushing the boundaries of what glass can achieve.

Our Journey Since 1991

1991	Founded by Mr. Jagdish Arya with a vision to revolutionize glass artistry in India.
1995	Expanded into architectural glass solutions for residential and commercial projects.
2000	Introduced customized designer glass and back-painted glass finishes.
2005	Established in-house manufacturing with advanced cutting and processing capabilities.
2010	Launched Glass Artifacts & Antiques division, catering to luxury interior markets.
2015	Added CNC Router and Double-Head Cutting Machines for precision engineering.
2020	Expanded into Aluminium & Stainless Steel Windows and Doors systems.
2026	Pioneering Future Façade Solutions and advanced architectural exterior systems.

Core Values

- **Artistic Excellence** — We treat every project as a masterpiece in the making.
- **Technical Precision** — Advanced machinery meets meticulous craftsmanship.
- **Client Partnership** — We collaborate closely to bring visions to life.
- **Innovation** — Constantly exploring new techniques, finishes, and applications.
- **Integrity** — Transparency in process, pricing, and delivery.
- **Sustainability** — Committed to environmentally responsible practices.

02 FOUNDER & LEGACY

PHOTOGRAPH TO BE ADDED

Mr. Jagdish Arya — Founder Portrait

Mr. Jagdish Arya — Founder & Mentor

The story of Arya Glass begins with the vision, passion, and pioneering spirit of Mr. Jagdish Arya. As the founder and guiding mentor of the organization, Mr. Arya transformed a humble dream into one of India's most respected names in architectural and customized glass solutions.

His journey was not merely about building a business — it was about elevating glass art to the next level. With an artist's eye and an entrepreneur's determination, Mr. Jagdish Arya introduced India to a new dimension of glass craftsmanship, where every surface tells a story and every installation becomes a statement of refined taste.

"His legacy is not written in words, but etched in glass — visible in every project, every innovation, and every life touched by his vision."

Under his mentorship, Arya Glass developed a culture of creativity, craftsmanship, innovation, and excellence that continues to define us today. The pride we take in our work is a direct reflection of the values he instilled: that quality is non-negotiable, that beauty must be functional, and that every client deserves nothing less than perfection.

Today, as we carry forward his legacy into a new era of architectural glass and façade solutions, we remain deeply committed to the principles he established. Mr. Jagdish Arya's vision lives on in every precision-cut pane, every back-painted finish, every designer artifact, and every satisfied client who chooses Arya Glass.

03 LEADERSHIP & TEAM

Leadership & Team

Arya Glass is powered by a dynamic leadership team and a dedicated workforce that brings together decades of combined experience in glass manufacturing, design, installation, and project management. Our people are our greatest asset, and their expertise ensures that every project is executed with precision, passion, and professionalism.

Executive Leadership

Mr. Sandeep Ahir

Chief Executive Officer

Leading Arya Glass with strategic vision and operational excellence. Mr. Ahir drives business growth, client relationships, and the company's expansion into new architectural frontiers.

Mr. Yogesh Yadav

HR & Logistics Head

Overseeing human resources, talent development, and supply chain logistics to ensure seamless operations and a motivated workforce.

Mr. Rinku Yadav

IT & Accounts Head

Managing financial operations, digital infrastructure, and technological systems that power Arya Glass's modern manufacturing and client management capabilities.

Mr. Ghanshyam Maurya

Chief Technical Officer (Windows, ACP, Façade, Spider Glazing)

Bringing technical expertise to on-site execution, ensuring that every installation meets the highest standards of structural integrity and aesthetic finish.

Mr. Santosh Yadav

Windows & Doors Installation Head

Spearheading the Aluminium and Stainless Steel Windows & Doors division with specialized knowledge of sliding systems, designer frames, and precision fitting.

Sonu & Jitu

Senior Artists

The creative soul of Arya Glass. These master craftsmen bring decades of artistic expertise to customized glass design, artifacts, antiques, and decorative finishes that define our signature style.

The Wider Team

Beyond our leadership, Arya Glass is supported by an exceptional team of manufacturing specialists, glass processing technicians, installation experts, quality control professionals, design coordinators, and client support staff.

04 MANUFACTURING EXCELLENCE

Manufacturing Excellence

At the heart of Arya Glass's reputation for quality lies our state-of-the-art manufacturing facility, where advanced technology meets time-honored craftsmanship. Our in-house production capabilities enable us to maintain complete control over quality, timelines, and customization — ensuring that every product that leaves our facility meets the exacting standards our clients expect.

MANUFACTURING PLANT

In-House Capabilities

- Precision Glass Cutting with automated and manual systems for complex shapes and bulk orders
- CNC Router Machining for intricate drilling, grooving, and edge profiling
- Double-Head Cutting Machine for simultaneous multi-panel processing and rapid turnaround
- Edge Polishing and beveling for flawless finishing on all glass types
- NR Works (Notch & Radius) for specialized architectural fitting requirements
- Sand Blasting for textured and privacy glass applications
- Back Painting with metallic, matte, ombre, and leather-effect finishes
- Metallic Finish Coating for luxury designer glass applications
- Matte Coating for sophisticated, non-reflective surfaces
- Ombre Back Painting for gradient color transitions and artistic effects
- Designer Fabric Texture application on glass for unique tactile surfaces
- Mirror Processing and LED Mirror Assembly for modern bathroom and vanity solutions
- Bulk Production Capability for large-scale corporate and commercial orders
- Rigorous Quality Control at every stage of production

CNC Router Machine

CNC ROUTER MACHINE

Our CNC Router Machine represents the pinnacle of precision engineering in glass processing. This advanced computer-numerical-control system enables us to execute complex cutting patterns, intricate edge profiles, precise drilling, and detailed grooving with micron-level accuracy. Whether creating custom designer panels for luxury interiors or processing large architectural glass sheets for commercial façades, our CNC Router ensures consistency, speed, and perfection in every cut.

Double-Head Cutting Machine

DOUBLE-HEAD CUTTING MACHINE

The Double-Head Cutting Machine dramatically enhances our production efficiency by enabling simultaneous processing of multiple glass panels. This capability is essential for large-scale projects requiring hundreds of identical or complementary pieces — such as hotel installations, corporate office fit-outs, and multi-unit residential developments. The result is faster turnaround times without compromising the precision and quality that define the Arya Glass standard.

Corporate Order Capacity

Arya Glass is fully equipped to handle high-volume corporate orders with the same attention to detail as bespoke custom projects. Our manufacturing infrastructure, combined with skilled workforce management and streamlined logistics, enables us to deliver large quantities of processed glass within demanding deadlines — making us the trusted partner for builders, developers, and contractors across India.

05 PRODUCTS & SERVICES

Products & Services

Arya Glass offers a comprehensive portfolio of glass products and services designed to meet the diverse needs of architects, interior designers, builders, and homeowners. From structural architectural glass to exquisite decorative artifacts, our range reflects our commitment to innovation, quality, and aesthetic excellence.

Architectural Glass

Our architectural glass solutions form the backbone of modern building design. We supply and install high-performance glass for façades, partitions, skylights, staircases, railings, and structural glazing applications. Every architectural glass project is engineered for safety, durability, thermal performance, and visual impact.

Shower Cubicles

Transforming everyday bathrooms into sophisticated private retreats, Arya Glass offers elegant and customized glass shower cubicles designed for modern luxury living. Crafted with precision and attention to detail, our solutions combine premium glass, refined hardware, and contemporary design to create spaces that are sleek, functional, safe, and visually seamless.

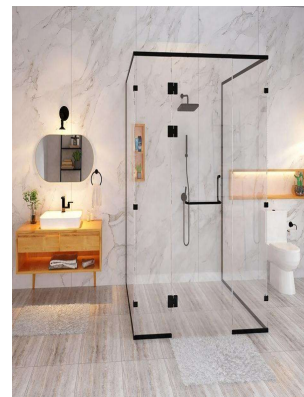

From minimalist frameless enclosures to customized designs, we deliver shower solutions tailored to the architecture and aesthetics of each space.

Designer Glass & Customized Solutions

For clients seeking something truly unique, our Designer Glass division offers limitless creative possibilities. We collaborate with architects and designers to produce one-of-a-kind glass installations that become the focal point of any space. From concept to completion, our team works closely with clients to realize their creative vision.

*DESIGNER GLASS / GLASS ARTIFACTS*

Glass Artifacts & Antiques

Our Glass Artifacts & Antiques collection celebrates the timeless beauty of hand-crafted glass. These pieces — ranging from decorative panels and sculptures to vintage-inspired mirrors and ornamental objects — add character, elegance, and a sense of heritage to luxury interiors. Each artifact is crafted by our senior artists with meticulous attention to detail.

Mirrors & Back-Painted Glass

Our mirror solutions include standard, antique-finish, and LED-integrated mirrors for bathrooms, vanity areas, dressing rooms, and decorative wall installations. Our Back-Painted Glass finishes offer a sleek, contemporary alternative to traditional wall coverings, available in an extensive palette of colors and specialty effects.

Back-Painted Glass Finishes

Decorative Glass Finishes

- **Sand Blasted Glass** — Elegant frosted textures for privacy and diffusion
- **Metallic Finish Glass** — Luxurious reflective surfaces in gold, silver, bronze, and copper tones

- **Matte Coating** — Sophisticated non-reflective surfaces for understated elegance
- **Ombre Back Painting** — Stunning gradient transitions for artistic wall features
- **Leather Finish** — Tactile, textured surfaces that mimic premium leather
- **Designer Fabric Texture** — Unique woven-texture effects embedded in glass

06 WINDOWS & DOORS DIVISION

Windows & Doors Division

Arya Glass has expanded its expertise beyond glass processing to offer a comprehensive range of Aluminium and Stainless Steel Windows and Doors. This division combines our deep knowledge of glass with premium framing systems to deliver complete fenestration solutions that are beautiful, durable, and engineered for the Indian climate.

ALUMINIUM WINDOWS & WOODEN GLASS DOOR

Product Range

- **Aluminium Systems** — High-performance aluminium frames with thermal break technology for energy efficiency

- **Stainless Steel Systems** — Premium SS frames offering unmatched strength, corrosion resistance, and modern aesthetics
- **Sliding Systems** — Smooth-operating sliding windows and doors for space-efficient, contemporary designs
- **Designer Windows** — Custom-designed window systems that integrate seamlessly with architectural glass features
- **Designer Doors** — Statement entrance doors, patio doors, and interior doors with glass inlays and custom finishes

Our Windows & Doors division is led by Mr. Santosh Yadav, whose expertise in installation ensures that every frame is fitted with millimeter precision, providing optimal weather sealing, acoustic insulation, and structural integrity.

07 MANUFACTURING PROCESS

Manufacturing Process

Every Arya Glass product undergoes a rigorous, multi-stage manufacturing process designed to ensure precision, quality, and consistency. From the moment a project is commissioned to the final installation, our process is meticulously managed and quality-controlled at every step.

01	Site Measurement	Our field engineers conduct detailed on-site measurements to ensure perfect fit and integration with existing architectural elements.
02	Design & Engineering	Our design team develops technical drawings and 3D visualizations, collaborating closely with architects and clients to refine every detail.
03	Precision Cutting	Glass is cut to exact specifications using automated cutting tables and the Double-Head Cutting Machine for bulk efficiency.
04	CNC Drilling & Profiling	The CNC Router executes precise drilling, notching, grooving, and edge profiling for complex architectural requirements.
05	Edge Polishing	All cut edges are polished to achieve a smooth, safe, and optically flawless finish.
06	NR Works	Specialized notch cutting and radius profiling for structural fittings, hinges, and hardware integration.
07	Sand Blasting	Surface texturing through controlled sand blasting for privacy, diffusion, or decorative effects.
08	Back Painting	Application of premium back-painted finishes in solid colors, metallics, and specialty effects.
09	Metallic & Specialty Finishes	Application of metallic coatings, matte finishes, ombre gradients, leather textures, and designer fabric impressions.
10	Mirror Processing	Cutting, edging, and finishing of mirror glass with optional antique or decorative treatments.
11	LED Mirror Assembly	Integration of LED lighting systems into mirror panels for modern bathroom and vanity applications.
12	Quality Inspection	Comprehensive quality control checks at every stage, including dimensional accuracy, surface finish, structural integrity, and optical clarity.
13	Protective Packaging	Secure packaging with foam, corner protectors, and crating for safe transportation to site.
14	Final Installation	Our expert installation team ensures perfect placement, alignment, sealing, and finishing on-site.

08 PROJECT SEGMENTS

Project Segments

Arya Glass serves a diverse portfolio of project types, each demanding a unique approach to design, material selection, and execution. Our experience spans luxury residences, commercial developments, hospitality venues, and retail environments — delivering tailored glass solutions that enhance architectural vision and elevate user experience.

Luxury Residences, Bungalows & Villas

LUXURY RESIDENTIAL / BUNGALOW PROJECT

LUXURY RESIDENTIAL / BUNGALOW PROJECT

Our residential division specializes in creating bespoke glass solutions for high-end homes, bungalows, and villas. From grand entrance doors and sweeping staircases to intimate

bathroom vanities and decorative wall features, we bring a level of craftsmanship and personalization that transforms houses into homes of distinction.

- Custom entrance doors with glass inlays and designer frames
- Glass staircases, railings, and balustrades
- Back-painted glass wall panels and kitchen backsplashes
- LED mirrors and vanity solutions for bathrooms
- Glass partitions and room dividers
- Decorative glass artifacts and antique mirrors
- Designer windows and sliding door systems
- Glass skylights and atrium features

Commercial Projects

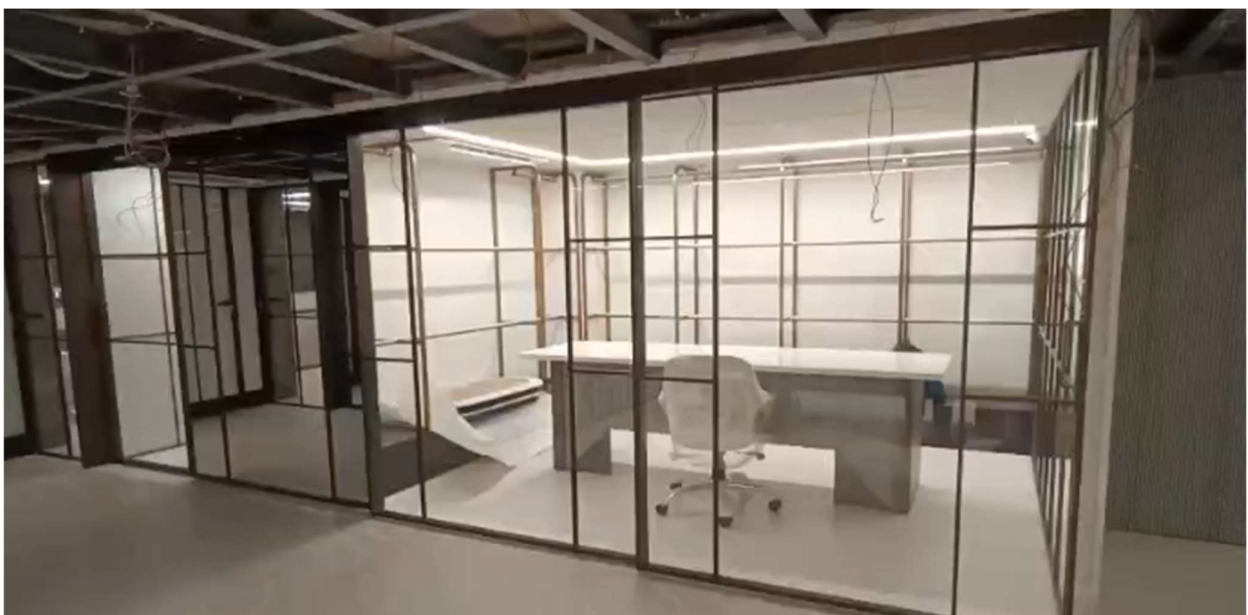

COMMERCIAL PROJECT – STRUCTURAL GLAZING

In the commercial sector, Arya Glass delivers large-scale glass solutions for corporate offices, retail showrooms, hotels, and hospitality venues. Our bulk production capability, combined with rigorous quality control, ensures that even the most demanding commercial timelines and specifications are met with excellence.

- Structural glazing and curtain wall systems
- Glass partitions and conference room enclosures
- Reception desk glass and branded back-painted panels
- Retail display cases and showcase glass
- Hotel lobby features, elevator cladding, and bathroom vanities
- Restaurant and bar glass installations
- Façade glazing and exterior building envelopes
- Corporate branding through custom glass etching and painting

Apartments & Multi-Unit Developments

For developers building apartment complexes and multi-unit residential projects, Arya Glass offers standardized yet premium glass solutions that can be replicated across hundreds of units while maintaining consistent quality. Our Double-Head Cutting Machine and streamlined production processes make us the ideal partner for large-scale residential developments.

09 WHY ARYA GLASS

Why Arya Glass

In a competitive market filled with glass suppliers, Arya Glass distinguishes itself through a unique combination of heritage, capability, and client commitment. Here is why architects, designers, builders, and homeowners continue to choose us as their trusted glass partner.

35+ Years of Experience

Since 1991, we have accumulated decades of expertise in glass manufacturing, design, and installation. This depth of experience means we have encountered — and solved — virtually every challenge that glass projects can present.

Advanced Manufacturing

Our investment in CNC Router technology, Double-Head Cutting Machines, and comprehensive in-house processing capabilities places us at the forefront of India's glass manufacturing industry.

Custom Design Capability

No project is too complex or too unique. Our designer glass division, led by senior artists Sonu and Jitu, can realize virtually any creative vision in glass.

Premium Finishing

From metallic coatings to leather textures, ombre gradients to designer fabric impressions, our finishing capabilities are unmatched in their variety and quality.

Skilled Installation Team

Led by field experts like Mr. Ghanshyam Maurya and Mr. Santosh Yadav, our installation team ensures that every product is fitted with precision and care.

Timely Delivery

We understand that construction timelines are non-negotiable. Our manufacturing efficiency and logistics expertise ensure on-time delivery for every project, large or small.

End-to-End Service

From initial consultation and site measurement to design, manufacturing, and final installation, we manage the entire process — providing our clients with a single point of accountability.

Competitive Value

Despite our premium positioning, we offer transparent, competitive pricing that reflects genuine value for the quality and service delivered.

10 OUR PARTNERS & VENDORS

Our Partners & Vendors

Arya Glass collaborates with leading hardware, hinge, aluminium, and glazing-systems manufacturers from India and around the world — ensuring every project benefits from globally trusted components.

11 FUTURE FAÇADE & ALUMINIUM EXPANSION

Future Façade & Aluminium Expansion

As Arya Glass looks toward the future, we are investing strategically in new capabilities and market segments that will define the next chapter of our growth. Our expansion roadmap is designed to position Arya Glass as a comprehensive architectural solutions provider, extending our expertise from interior glass to complete building envelope systems.

Architectural Façade Solutions

Our most ambitious expansion initiative focuses on architectural façade solutions — complete exterior building envelope systems that combine structural glazing, aluminium cladding, curtain walls, and high-performance glass panels. These systems are essential for modern commercial towers, mixed-use developments, and landmark buildings that demand both aesthetic distinction and energy efficiency.

By integrating our deep glass expertise with advanced façade engineering, Arya Glass will offer turnkey exterior solutions that include design consultation, structural analysis, material supply, fabrication, and installation. This expansion aligns with global trends in sustainable building design and positions us to compete for prestigious commercial and institutional projects across India.

Aluminium Business & Systems

Building on the success of our Windows & Doors division, we are significantly expanding our Aluminium Business & Systems capabilities. This includes investment in additional aluminium fabrication machinery, expanded inventory of premium aluminium profiles, and enhanced design and engineering resources dedicated to aluminium systems.

- Expanded range of aluminium window and door systems for residential and commercial applications
- Aluminium curtain wall and structural glazing systems
- Aluminium louvers, sunshades, and architectural screens
- Custom aluminium fabrication for interior and exterior applications
- Integration of aluminium systems with our glass processing capabilities for seamless project delivery

Advanced Architectural & Exterior Building Solutions

Beyond façades and aluminium, our future expansion encompasses a broader portfolio of advanced architectural and exterior building solutions. This includes canopies, skylights, atrium glazing, balustrade systems, and custom metal-and-glass assemblies that push the boundaries of contemporary design.

We are also exploring partnerships with international glass and façade technology providers to bring the latest innovations in energy-efficient glazing, smart glass, and sustainable building materials to the Indian market. Our vision is to make Arya Glass synonymous with cutting-edge architectural excellence.

12 CSR, CLIMATE & CARBON VISION

CSR, Climate Change & Carbon Reduction Vision

At Arya Glass, we recognize that our responsibility extends beyond manufacturing excellence to the health of our planet and the well-being of our communities. We are committed to building a sustainable future by integrating climate-conscious practices into every aspect of our business operations.

Climate-Conscious Business Practices

We are actively working to reduce the environmental footprint of our manufacturing processes. This includes optimizing energy consumption in our production facility, implementing waste reduction protocols, and transitioning to more sustainable materials and packaging wherever possible. Our goal is to minimize our carbon emissions while maintaining the uncompromising quality our clients expect.

Reducing Carbon Emissions

- Transitioning to energy-efficient LED lighting and machinery throughout our manufacturing plant
- Optimizing logistics and delivery routes to reduce transportation emissions
- Exploring renewable energy options for our facility, including solar power integration
- Partnering with suppliers who share our commitment to sustainable manufacturing practices
- Implementing recycling programs for glass offcuts, aluminium scrap, and packaging materials

Responsible Use of Resources

Resource efficiency is central to our sustainability strategy. We employ precision cutting technologies — including our CNC Router and Double-Head Cutting Machine — to maximize material yield and minimize waste. Water used in our glass processing operations is recycled and treated before discharge. We continuously evaluate our supply chain to ensure that raw materials are sourced responsibly and ethically.

Sustainable Materials & Processes

We are actively researching and adopting sustainable alternatives in our product range, including low-emissivity (Low-E) glass for energy-efficient buildings, recycled glass content in select products, and eco-friendly coating materials. Our back-painting and finishing processes are being upgraded to use water-based and low-VOC formulations wherever feasible.

Supporting a Greener Future

Arya Glass is proud to support the construction and architectural industry's transition toward greener, more sustainable building practices. We believe that beautiful design and environmental responsibility are not mutually exclusive — and we are committed to proving that every day through our products, processes, and partnerships.

"Our commitment to sustainability is not a destination — it is a continuous journey of improvement, innovation, and responsibility."

13 VISION, MISSION & CONTACT

Our Vision

To be India's most trusted and innovative provider of architectural glass, designer glass, and building envelope solutions — recognized globally for our commitment to artistry, engineering excellence, and sustainable practices. We envision a future where every building tells a story through glass, and where Arya Glass is the name behind the most iconic architectural landmarks.

Our Mission

To deliver world-class glass and architectural solutions that exceed client expectations through continuous innovation, uncompromising quality, and deeply personalized service. We are dedicated to honoring our founder's legacy while embracing the technologies and practices that will define tomorrow's built environment.
